Bayesian Learning for Neural Networks (Lecture Notes in Statistics)

Radford M. Neal

Bayesian Learning for Neural Networks (Lecture Notes in Statistics) Radford M. Neal
Artificial "neural networks" are widely used as flexible models for classification and regression applications, but questions remain about how the power of these models can be safely exploited when training data is limited. This book demonstrates how Bayesian methods allow complex neural network models to be used without fear of the "overfitting" that can occur with traditional training methods. Insight into the nature of these complex Bayesian models is provided by a theoretical investigation of the priors over functions that underlie them. A practical implementation of Bayesian neural network learning using Markov chain Monte Carlo methods is also described, and software for it is freely available over the Internet. Presupposing only basic knowledge of probability and statistics, this book should be of interest to researchers in statistics, engineering, and artificial intelligence.

From reader reviews:

Stacy Vincent:

What do you consider book? It is just for students since they are still students or the item for all people in the world, what the best subject for that? Just simply you can be answered for that problem above. Every person has different personality and hobby for every single other. Don't to be pressured someone or something that they don't would like do that. You must know how great and also important the book Bayesian Learning for Neural Networks (Lecture Notes in Statistics). All type of book can you see on many sources. You can look for the internet methods or other social media.

Sara Kelly:

As people who live in the particular modest era should be up-date about what going on or details even knowledge to make these individuals keep up with the era that is certainly always change and move forward. Some of you maybe will certainly update themselves by reading books. It is a good choice for you personally but the problems coming to an individual is you don't know which you should start with. This Bayesian Learning for Neural Networks (Lecture Notes in Statistics) is our recommendation to make you keep up with the world. Why, because this book serves what you want and wish in this era.

Andrew Purdie:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their sparetime with their family, or their very own friends. Usually they performing activity like watching television, about to beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Will you something different to fill your free time/ holiday? Can be reading a book can be option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the publication untitled Bayesian Learning for Neural Networks (Lecture Notes in Statistics) can be excellent book to read. May be it can be best activity to you.

Iva Simmon:

A lot of guide has printed but it is different. You can get it by online on social media. You can choose the most effective book for you, science, witty, novel, or whatever by searching from it. It is called of book Bayesian Learning for Neural Networks (Lecture Notes in Statistics). You can contribute your knowledge by it. Without causing the printed book, it can add your knowledge and make you happier to read. It is most crucial that, you must aware about publication. It can bring you from one location to other place.
