Beastly Questions: Animal Answers to Archaeological Issues Naomi Sykes

Zooarchaeology, the study of ancient animals, is a frequently side-lined subject in archaeology. This 'important and provocative' volume, now available in paperback, provides a crucial reversal of this bizarre situation - 'bizarre' because the archaeological record is composed largely of debris from human–animal relationships (be they in the form of animal bones, individual artifacts or entire landscapes) and many disciplines, including anthropology, sociology, and geography, recognise human–animal interactions as a key source of information for understanding cultural ideology.

By integrating knowledge from archaeological remains with evidence from texts, iconography, social anthropology and cultural geography, *Beastly Questions: Animal Answers to Archaeological Issues* seeks to encourage archaeological students, researchers and those working in the commercial sector to offer more engaging interpretations of the evidence at their disposal. Going beyond the simple confines of 'what people ate', this accessible but in-depth study covers a variety of high-profile topics in European archaeology and provides novel interpretations of mainstream archaeological questions. This includes cultural responses to wild animals, the domestication of animals and its implications on human daily practice, experience and ideology, the transportation of species and the value of incorporating animals into landscape research, the importance of the study of foodways for understanding past societies and how animal studies can help us to comprehend issues of human identity and ideology: past, present and future.
