Mastering Algorithms with Perl

Jarkko Hietaniemi, John Macdonald, Jon Orwant

Mastering Algorithms with Perl Jarkko Hietaniemi, John Macdonald, Jon Orwant

Many programmers would love to use Perl for projects that involve heavy lifting, but miss the many traditional algorithms that textbooks teach for other languages. Computer scientists have identified many techniques that a wide range of programs need, such as:

- Fuzzy pattern matching for text (identify misspellings!)
- Finding correlations in data
- Game-playing algorithms
- Predicting phenomena such as Web traffic
- Polynomial and spline fitting

Using algorithms explained in this book, you too can carry out traditional programming tasks in a high-powered, efficient, easy-to-maintain manner with Perl.This book assumes a basic understanding of Perl syntax and functions, but not necessarily any background in computer science. The authors explain in a readable fashion the reasons for using various classic programming techniques, the kind of applications that use them, and -- most important -- how to code these algorithms in Perl.If you are an amateur programmer, this book will fill you in on the essential algorithms you need to solve problems like an expert. If you have already learned algorithms in other languages, you will be surprised at how much different (and often easier) it is to implement them in Perl. And yes, the book even has the obligatory fractal display program.There have been dozens of books on programming algorithms, some of them excellent, but never before has there been one that uses Perl.**The authors include the editor of *The Perl Journal* and master librarian of CPAN; all are contributors to CPAN and have archived much of the code in this book there.**"This book was so exciting I lost sleep reading it." Tom Christiansen

From reader reviews:

Donald Labelle:

Nowadays reading books be than want or need but also become a life style. This reading practice give you lot of advantages. The advantages you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want send more knowledge just go with education and learning books but if you want truly feel happy read one using theme for entertaining including comic or novel. The particular Mastering Algorithms with Perl is kind of publication which is giving the reader unforeseen experience.

James Fulk:

Many people spending their time period by playing outside together with friends, fun activity with family or just watching TV the entire day. You can have new activity to enjoy your whole day by reading through a book. Ugh, do you consider reading a book will surely hard because you have to accept the book everywhere? It all right you can have the e-book, taking everywhere you want in your Smartphone. Like Mastering Algorithms with Perl which is having the e-book version. So , try out this book? Let's see.

Christopher Melendez:

As a pupil exactly feel bored for you to reading. If their teacher inquired them to go to the library in order to make summary for some guide, they are complained. Just minor students that has reading's internal or real their leisure activity. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Mastering Algorithms with Perl can make you truly feel more interested to read.

Sheila Collins:

Reserve is one of source of expertise. We can add our know-how from it. Not only for students but also native or citizen require book to know the revise information of year to year. As we know those publications have many advantages. Beside most of us add our knowledge, can also bring us to around the world. With the book Mastering Algorithms with Perl we can have more advantage. Don't someone to be creative people? For being creative person must want to read a book. Merely choose the best book that suitable with your aim. Don't always be doubt to change your life with that book Mastering Algorithms with Perl. You can more inviting than now.
