Electronic Gags: A Futuristic Dystopian Science Fiction Thriller Kudakwashe Muzira
Electronic Gags presents a chilling portrait of a dystopian United States ruled by a tyrant.

After a military coup, the United States of America becomes an autocracy. To tighten his grip on power, President Brandon Ward, the megalomaniac at the helm of military dictatorship, introduces a new surveillance system that can monitor people's offline conversations. Privacy is dead.

Freddie's life changes when the government arrests his best friend, Michael, for attending an opposition meeting. Michael's mother accuses Freddie of betraying her son. Against all odds, Freddie must prove his innocence and save Michael from death row. The only way for Freddie to save Michael is to overthrow the government.

Unlike your everyday action hero, Freddie is not an agile ex-special forces operative. He is just a fat biologist who works in a wildlife refuge. And the government is watching him. It is watching everyone.
