Hispanic Linguistics at the Crossroads: Theoretical linguistics, language acquisition and language contact. Proceedings of the Hispanic Linguistics ... in Hispanic and Lusophone Linguistics)
This collection of articles, contributed by both experienced and novice researchers, addresses core issues in three different domains of Hispanic Linguistics: theoretical linguistics, language acquisition and language contact. Together these papers provide an overview of how the analysis of Spanish contributes to current formal and experimental linguistics, while on an individual level offering fine-grained analyses and innovative proposals covering a wide range of areas such as semantics and pragmatics, syntax, morphology, phonology, prosody, dialectal variation, first, second and bilingual language acquisition, as well as sociolinguistics. The volume will be a resource for graduate students, academics and researchers in theoretical, experimental and descriptive linguistics in general and Hispanic Linguistics in particular.The selection of chapters included in this volume were presented at the *17th Hispanic Linguistics Symposium* hosted in October 2013 by the Language Acquisition Research Laboratory at the University of Ottawa in Ottawa, Canada.
